The Robotic Skies Network — Over  
175 Service Centers Worldwide

## No Franchise Fees. No Equipment to Buy. Just New Revenue.

Robotic Skies is the only global network of certified repair stations assembled to provide maintenance and repair services to the commercial UAS industry. We provide turnkey local maintenance solutions to drone manufacturers and operators. As a brokered network, we can help you tap into these new revenue opportunities.

### Your Experience Paves the Way

Regulations for commercial unmanned operations will closely mirror those of the manned aviation industry, including maintenance requirements.

Your knowledge and experience of operating in a regulated environment gives you a familiar path towards the adoption of unmanned maintenance support.

### How it Works

Through formal UAS manufacturer partnerships, Robotic Skies identifies operator customers, negotiates the rates, and funnels work orders to you. The customers pay us and we pay you.

### We Support You

Robotic Skies will train your technicians on specific maintenance procedures, airworthiness practices, and regulatory requirements as they develop, allowing you to capitalize on new business with the support you need to get going.

### UAS Maintenance Needs & Opportunities

- MRO and warranty work
- Airframe assembly and completion
- Battery and parts logistics
- Regulatory compliance support
- Ground crew launch and recovery support

### Let's Talk!

The network includes more than 175 Service Centers across 40 countries - and we're looking for more! Contact us today: [network@roboticskies.com](mailto:network@roboticskies.com)
