
A high-angle photograph of a technician wearing glasses and a light-colored shirt, focused on working on a complex robotic arm. The scene is bathed in a blue light, and the technician's shirt has the word 'robotic' visible on it. The robotic arm is dark and has several joints and sensors.

THE GLOBAL NETWORK FOR PROFESSIONAL UAS MAINTENANCE

Be Part Of Aviation's Future

Supporting the global fleet of commercial Unmanned Aircraft Systems (UAS) will be a huge job, and as a certified repair station, you already have the talent and equipment to succeed.

Over 230 locations across
50 countries - and growing!

JOIN IN THE FUTURE OF AVIATION MAINTENANCE

We are seeking FAA Part 145 Repair Stations
to join the Robotic Skies network.

Who Is Robotic Skies

Robotic Skies brings together existing FAA Part 145 repair stations into a global maintenance provider network to serve the emerging commercial drone industry. The knowledge, skills, and abilities of professionally trained aviation technicians and mechanics readily adapt to drone maintenance and repair activities.

In addition, the network's global footprint is a unique and compelling offering for drone manufacturers and operators looking to grow their fleet or optimize expansion into new regions. Regulatory trends continue to align with what we see in traditional aviation, including the type certification of commercial UAS and the related requirements for operators to use a certified maintenance solution.

Robotic Skies is a ready-made support infrastructure designed to keep the global UAS fleet flying safely and productively.

Network Membership Benefits

- Access new revenue opportunities in an emerging market
- Joining is low-risk - there's no upfront investment in fees or equipment
- Complimentary business development - on your behalf, Robotic Skies pursues opportunities with manufacturers and operators to bring you jobs that are worth your time
- Comprehensive, just-in-time factory-approved training for your technicians
- Regulatory guidance and on-demand support from Robotic Skies' in-house experts
- First right of refusal on any work we send your way
- Exclusive locality*

**An exclusive geographic radius that is typically a one-hour drive, granted on a first-come, first-served basis*
